1. EDUCATION

UNA University Center | B.Sc. in Computer Science | Feb 2022 - Dec 2025

Relevant Coursework: Algorithms & Data Structures, Optimization, Computer Theory, Complexity Analysis, Operating Systems, Programming Languages, Software Engineering and Artificial Intelligence.

2. PROFESSIONAL EXPERIENCE

MULTITECNICA INDUSTRIAL S.A | System Programmer | Sep 2025 - Present

Context: Development of enterprise software solutions focused on ERP customization, business process automation, systems integration and internal web applications.

Action/Result: Developed enterprise solutions by extending TOTVS Protheus with custom integrations, and designed internal applications using Next.js, Angular, and NestJS. Optimized Microsoft SQL Server queries to **improve system performance** by up to **84%**, and led the company's version control migration from SVN to Git, establishing modern collaboration workflows for **15+ developers** across internal teams and third-party partners.

ALGHORIT TECNOLOGIA LTDA | Software Development Analyst | Oct 2024 - Sep 2025

Context: Development of Android, backend and web applications for enterprise clients, delivering scalable software solutions across multiple platforms.

Action/Result: Developed scalable Android applications using Kotlin and Jetpack Compose, adhering to Clean Architecture and SOLID principles. Built backend services with NestJS and frontend apps with Angular, ensuring high reliability through automated testing. Additionally, designed GitLab CI/CD pipelines with Docker, automating deployment workflows and **reducing build times** by up to **67%**.

ALGHORIT TECNOLOGIA LTDA | Mobile Developer Intern | Apr 2023 - Oct 2024

Context: Native Android application development focused on delivering modern, reliable and user-friendly mobile experiences.

Action/Result: Maintained native Android apps and played a key role in migrating legacy XML-based layouts to modern Jetpack Compose. Implemented RESTful APIs and applied Dependency Injection (Hilt/Koin) to improve **application scalability** and **maintainability**.

Inter sete Telecom | Technical Support Intern | Apr 2022 - Dec 2022

Context: Technical support and network infrastructure maintenance for residential and business customers.

Action/Result: Diagnosed and resolved network connectivity issues, ensuring service reliability and minimizing downtime for **20+ customers daily**. Configured routers and fiber optic equipment while actively assisting field technicians with incident resolution.

3. PROJECTS

- Software Developer | Professional Landing Page (2026): Developed a Next.js landing page integrated with Instagram and Google Places APIs to dynamically display content and real-time reviews.
- Software Developer | Laboratory Operations Dashboard (2026): Built a real-time monitoring dashboard for lab operations, reducing response times for sample analyses via visual and audible alerts.
- Software Developer | Contourline Clientes (2025): Developed and published a cross-platform mobile application (Ionic/Angular) for both Google Play and the Apple App Store.
- Software Developer | Algorit Device (2023 - 2025): Contributed to an industrial communication platform, implementing real-time messaging and radio features using a custom WebRTC SFU server.

4. TECHNICAL SKILLS

- Kotlin/Java: Advanced (Android SDK, Jetpack Compose, MVVM, Coroutines, Flow, Hilt, Koin).
- TypeScript/JavaScript: Advanced (Next.js, Angular, NestJS, Node.js, Full-stack enterprise development).

- Testing: JUnit, Mockito, Jest, Cypress.
- Core Concepts: Algorithms, Data Structures, OOP, SOLID, Clean Architecture, CI/CD, Git, SQL, Agile/Scrum.

5. LANGUAGES

- Portuguese: Native | English: Upper Intermediate
